- 4.) State Consistency Topics
 - a. The draft guidance *Revised Policy on Exclusions from Ambient Air* is available for public review and comment through December 21, 2018. The draft guidance and instructions for submitting comments can be found at <https://www.epa.gov/nsr/forms/draft-guidance-revised-policy-exclusions-ambient-air>.
 - b. The **National Emission Standards for Hazardous Air Pollutants: Manufacture of Amino/Phenolic Resins Risk and Technology Review Reconsideration** final rule was signed on 10/4/18 and published in the Federal Register on 10/15/18, at 83 FR 51842. The final rule revises MACT for continuous process vents (CPVs) at existing sources, extends the compliance date for CPVs at existing sources, and revises new and existing source storage vessel requirements when emission controls are undergoing planned maintenance. The final rule, effective 10/15/18, can be found at <https://www.gpo.gov/fdsys/pkg/FR-2018-10-15/pdf/2018-22395.pdf>.
 - c. EPA granted on a petition to respond for the Hanford Nuclear Site in the state of Washington. The petition claimed that the permitting authority did not make all information deemed to be relevant to the permitting authority during the public comment period. In the order, EPA concludes that the permitting authority's failure to provide all relevant materials prevented the public from knowing how the Title V permit will meet applicable requirements and prevented the public from meaningfully

participating in the permitting process. The petition is available here:
